# THE NEW DAWN

Plant Patent No. 1

is universally acknowledged to be the best everblooming hardy climbing rose. Vigorous in growth and perfectly hardy, it can be used to cover fences, trellises and for any other purpose where a climbing rose would be suitable. It may also be grown as an arching shrub.

The foliage is a glossy dark green, resistant to disease and insect attack while the delicate pink flowers are of good size and form, fully double, exquisitely fragrant and are produced on good stems for cutting.

You can recommend **THE NEW DAWN** to your customers with confidence. It really blooms all Summer.

For prices, list of other roses, descriptions, see pages 30 and 32.

GOLD MEDAL awarded **THE NEW DAWN** by the American Rose Society for being the best hardy everblooming climbing rose.

# NOVELTIES MERITORIOUS INTRODUCTIONS SEEDS

## ACROCLINIUM SENSATION GIANTS

A florist flower par excellence—this new strain produces flowers half again larger than any existing strain and grows 6-8 inches taller.

The flowers are fully double and will average a good 3 inches across. The color ranges from light pink to medium rose.

The size and extra stem length should make this new everlasting an important cut flower.

Tr. Pkt. 50c; 1 Oz. \$2.50

## AGERATUM MIDGET BLUE—Silver Medal A. A. S.

In our trials this season, this variety was one of the best being more uniform than most strains and producing a high percentage of compact plants entirely covered with small blue flowers.

Tr. Pkt. 50c; 1/4 Oz. \$2.50

## ANTIRRHINIUM MAJUS GRAND. R. R. ROSALIE— Bronze Medal A. A. S.

This vigorous base branching variety produced some nice spikes in our trials outdoors, and we believe under cloth it would be commercially worthwhile growing for cut. The color is a rich deep rose with an underlying tone of amber.

Tr. Pkt. 50c; 1/8 Oz. \$1.25

*Calendula Yellow Colossal*

## CALENDULA YELLOW COLOSSAL

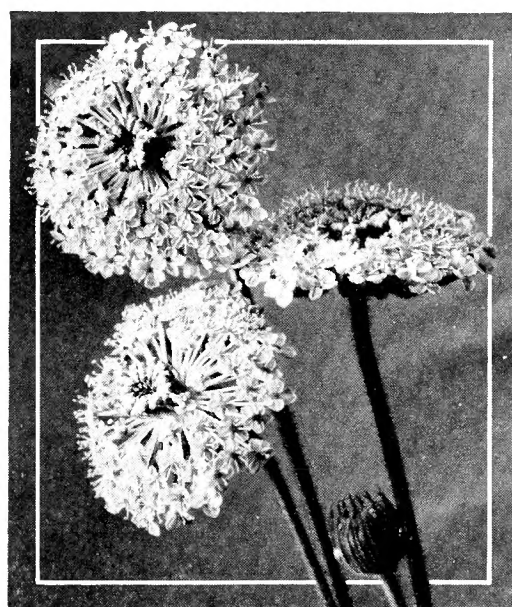

The originator calls this "The Biggest Calendula in the World" and describes it as the most profuse blooming of all large flowered Calendulas. Yellow Colossal apparently is of the Chrysantha type but the flowers are larger, more double, more compact and of better form. The plants grow 18 inches and the color is a clear cobalt yellow.

Tr. Pkt. 50c; 1 Oz. \$2.50

## CALENDULA DWARF BEDDING PALE MOON

A refreshing light cream or primrose yellow color makes this the nearest approach to white yet seen in Calendulas. The demand is increasing for pastel colored flowers and this variety should help fill this demand.

Tr. Pkt. 50c

*Imp. Blue Lace Flower*

## DIDISCUS COERULEUS IMPROVED WILT RESISTANT

Large flowers and more of them produced earlier. Increased vigor and a resistance to wilt, makes this a distinct improvement over the ordinary variety.

Tr. Pkt. \$1.00; 1/8 Oz. \$1.50; 1/4 Oz. \$2.75; 1 Oz. \$10.00

## DIANTHUS ROSE CUSHION

An iron hardy perennial that makes tight cushions of evergreen, gray green foliage 3 inches high studded with bright pink blooms in early Spring. The neat appearance of this plant makes it attractive for edgings even when not in flower and we recommend it for this purpose.

Tr. Pkt. 50c; 1/4 Oz. \$1.50

## LARKSPUR GIANT IMPERIAL PINK PERFECTION

An outstanding new color in this type, luscious lively light pink, early blooming heavy cutting spikes of closely spaced florets.

Tr. Pkt. 50c; 1 Oz. \$2.50

## —GIANT IMPERIAL ROSALIND

Rose with just enough suffusion of salmon to create a most pleasing new shade of rose pink. The blooms are non-shattering which makes it an excellent cut flower item.

Tr. Pkt. 50c; 1 Oz. \$2.50

Try some of the new items—you may profit

## LIATRIS SCARIOSA ALBA

This white variety has always been acknowledged to be a valuable cut flower sort, but due to the high price of plants was rarely grown. The seed we offer will come approximately 75% true and offers an excellent opportunity to obtain a stock at reasonable cost.

Tr. Pkt. 50c; 1 Oz. \$5.00

## MARIGOLD HARMONY TYPE FRENCH DWARF DOUBLE HYBRIDS

The great number of Marigold introductions are confusing to most florists, however Harmony has always been a popular sort and this new mixture should fill the need for a low growing even type in a lively assortment of mixed colors.

Tr. Pkt. 50c; 1/4 Oz. \$1.25

## NEW WINTER FLOWERING MARIGOLD WINTER HARMONY

An entirely new quilled scabious type for winter flowering in the greenhouse. Reddish brown guard petals encircle a golden orange quilled center. Uniform in growth it produces numerous 100% double 2 inch flowers.

Tr. Pkt. 50c; 1/4 Oz. \$1.00; 1 Oz. \$3.50

*Petunia Cream Star*

## PETUNIA NANA COMPACTA CREAM STAR— Silver Medal A. A. S.

Entirely distinct and unique in color and form of the flowers. The plants when fully grown are about 12 inches high and 14 inches across, neatly rounded and covered with flowers. These are a soft creamy white deepening towards the throat to a bright golden yellow. Should make a valuable addition to our list of bedding varieties.

Tr. Pkt. 50c

## —NANA COMPACTA GLOW—Silver Medal A. A. S.

This glowing rose red should become popular. The habit of the plant is uniform and it is excellent both as a pot plant and for bedding. The color is little effected by weather.

Tr. Pkt. 75c; 1/32 Oz. \$2.50; 1/16 Oz. \$4.50

## PETUNIA MINIATURE RUFFLED BETSY ROSS

The variety Martha Washington has always been one of our popular sorts and in Betsy Ross we have another variety that combines all its good qualities of dwarf compact growth and large ruffled flowers.

The color of Betsy Ross is red and white. (See color plate front cover.) The blooms average 2½ inches in diameter and are well ruffled. The entire effect is decidedly gay.

Tr. Pkt. \$1.00; 1/64 Oz. \$1.75; 1/32 Oz. \$3.00

## —DWARF GRANDIFLORA PRINCESS

This is of the same type as Lace Veil and Setting Sun, both popular pot plant varieties. The plants are very dwarf and compact and the large ruffled blooms are a brilliant deep rose red flushed scarlet.

Tr. Pkt. \$1.00

## —NANA COMPACTA VIOLET BLUE

The grand color of this new variety justifies its introduction. Uniform and compact in habit, the plants are covered the entire summer with the rich violet blue blooms.

Tr. Pkt. 50c; 1/4 Oz. \$1.75; 1 Oz. \$6.00

## —BALCONY RED WONDER

The brightest red of all Balcony Petunias. The flowers are large and bold, 3¾ inches across and brilliant red with a black throat. A fine sort.

Tr. Pkt. 50c

## —NANA COMPACTA SUNRISE

Unquestionably one of the best pink bedding Petunias. The very heavy foliage is dark green and remains in good condition the entire summer. The habit of the plant is compact and the very freely produced slightly frilled flowers are a brilliant rose washed with scarlet that makes most other pink bedding varieties look washed out by comparison. Excellent as a pot plant.

Tr. Pkt. 75c; 1/16 Oz. \$1.50; 1/8 Oz. \$2.75;  
1/4 Oz. \$5.00; 1 Oz. \$15.00

## STOCK COLUMN GARDENIA

The introducer describes this variety as producing flower spikes with 12-15 inches of florets and stems nearly 3 feet in length. Shimmering, glistening pure white in color, the percentage of doubles is higher than average.

There is great need for a good white column stock and we recommend giving this sort a trial.

Tr. Pkt. \$1.00; 1/4 Oz. \$4.50; 1 Oz. \$15.00

## —BRANCHING EARLY COLONIAL

This new branching type does not produce a center spike, therefore requires no pinching to make it branch. Eight to ten heavy branches are produced from the base of each plant and they form clusters or spikes with florets 15 inches long. The percentage of doubles will run about 70%.

The early branching habit of this class should make it a valuable cut flower. Three colors are available, Pure White (Puritan), Silvery Lavender (Pricilla), Red Rose (Mayflower).

Tr. Pkt. 50c; 1/4 Oz. \$1.50; 1 Oz. \$5.00

You have missed a good cut flower if you have not tried Scabiosa Blue Moon

Seed of Stock for forcing has always been more or less unpredictable with regard to the percentage of doubles it will produce. Selection of the strongest plants, growing in rich soil and proper feeding has been standard practice, but even under these conditions sometimes the percentage of doubles is too low for profit. To use all possible safeguards, our grower plants a quantity of each lot of seed and any lot that does not prove up to standard, is discarded.

Careful comparative tests have proved that our strains are equal to the best available and we feel convinced that we can satisfy the most critical.

Stock Column

### MAMMOTH FLOWERED COLUMN

#### Three New Colors

**Pink.** A soft Chatenay pink that is so useful for cut flower purposes. A really fine introduction.

**Lavender.** Several shades deeper than Silver Lilac but the individual flowers are almost one-half again as large. A fine sort.

**Salmon Rose.** We have used this name as best describing the color of this new development. The immense size of the double blooms and the unusual color make this a variety that will create attention wherever shown.

Any of the above three new colors: ½ Pkt. \$0.60; Tr. Pkt. \$1.00; ¼ Oz. \$2.50; Oz. \$9.00; Collection Tr. Pkt. of each color \$2.50.

### STANDARD VARIETIES COLUMN STOCK

**Silver Lilac.** The most popular color.

**Ball's White.** Tinted with pink. For a pure white, we recommend Santa Maria or Noble White.

**Rose Pink.** Fine clear rose pink.

**Rose Carmine.** A glowing deep rose flushed and washed with carmine.

**Violet.** This color is rather heavy but it is useful for some purposes.

**Ruby.** A rich red needed only in limited quantities. ½ Tr. Pkt. \$0.60; Tr. Pkt. \$1.00; ¼ Oz. \$2.25; Oz. \$8.00

Any Three packets \$2.50; any Five packets \$3.50

### FORCING BRANCHING TYPES

These varieties are really branching types but planted close they require very little pinching to produce spikes fully equal to the best column stock. Experience has shown that up until now they are the best of their color for forcing purposes.

**Santa Maria.** This grand white cannot be excelled for size, purity and percentage of doubles. The most profitable of all stocks.

## FORCING STOCKS—Continued

**Giant Noble White.** Blooms two weeks sooner than Santa Maria but is more variable in producing doubles.

**Chamois.** A really double strain of this difficult color. Tested for percentage of double blooms. Any of the above 3 varieties, Greenhouse grown seed.

Tr. Pkt. \$0.35; ¼ Oz. \$1.25; 1 Oz. \$4.00

## GIANTS OF CALIFORNIA

A branching type blooming about two weeks later than the Column. They have proved very satisfactory for forcing, and Santa Maria is perhaps the most profitable of all stocks.

**Santa Maria (white), Lavender, Rose, Yellow, Blue, Chamois, Mixed.**

Tr. Pkt. \$0.25; ¼ Oz. \$1.00; Oz. \$3.50

## IMPROVED BISMARCK

# ROSES

We recommend planting dormant roses in the Fall and very early Spring. Experience has shown that results with dormant plants are very uncertain after April 1st, and for that reason we offer potted roses only in our Spring list. Prices on this type of material are naturally higher but results are so superior, there is no question of value because the element of loss and complaint is practically eliminated.

## IMPORTANT

**PATENTED PLANTS**—All patented plants offered in this catalog are sold by us under License from the Patent owners, and it is understood and agreed to by the purchaser that they are for resale at retail only. The asexual reproduction of patented plants is reserved by the Patentees and is strictly prohibited under provisions of the Plant Patent Act.

Purchasers of Patented and Nationally advertised roses shall not list or sell them at less than the established price for the current season, and not less than three of a kind at the dozen rate. Nor include them in any collection offers, except in connection with other patented roses. Neither shall they be featured in any manner or form as a premium. Failure to comply with this policy will result in discontinuance of the supply.

# HARDY PERENNIALS & ROCK PLANTS

Interest in hardy perennials is constantly increasing. Garden magazines and Garden Clubs are spreading the knowledge of the choicer items. The reasonable price at which most plants are sold is also a big factor in creating a demand that means profit to you.

Many items are valuable cut flowers and they usually bloom at a time when greenhouse material is scarce. A planting of cut flower items will repay many times its original cost, with the natural increase available for resale.

**PRICES:** 1-3 of a variety at the each rate which is 5c added to the 100 rate. 4-24 plants at dozen rate. 25 or more at 100 rate.

## S U N R I S E NEW BEDDING PETUNIA

"All the world has been waiting for Sunrise", is an exaggeration, but it is no exaggeration to say that Sunrise is the best pink bedding Petunia.

The slightly frilled flowers are brilliant pink with a scarlet flush radiating from a small yellow throat, a glowing color that is set off by the heavy dark green foliage. The habit of the plant is compact and branching and at no time does Sunrise become leggy. This makes it excellent as a pot plant.
